# A new chapter in programmable thermostats.

Introducing the Honeywell T4 Series.

The CM900 has been the installers' preferred choice for years. But things have moved on ... The good news is that the more intelligent Honeywell T4 Series shares the same DNA as the CM900 with TPI & optimisation features, plus:

- It has 1 and 7 day scheduling built in
- It has a larger screen, making it easier to read
- It's easy to wire with a new wiring centre designed for installers
- It's simple to programme with an intuitive interface
- It has OpenTherm capability built in
- Ideal for any system, any boiler

For more information about the intelligent T4 Series, please visit: [honeywelluk.com](http://honeywelluk.com)

## Three layers of control

The T4 Series responds to demand for straightforward optimised heating adjustment with three levels of control.

Intuitive screen interface offers easy and optimal heating adjustment

Automated modulation control improves energy efficiency

Optimisation features learn how the room is heated, requiring little customer interaction

# A solution for every application.

The T4 Series is available in three models to cover all customer applications.

**T4**

Standard wired version ideal to fit in place of an existing thermostat

**T4R**

Wireless version with optional OpenTherm control via the receiver box, offering easy switch-over from an existing wireless receiver box

**T4M**

Wired modulating version with on-screen OpenTherm boiler information

## One thermostat for every installation

The T4 Series uses standard thermostat fittings and connections, offering installers an easy, inexpensive choice when it comes to replacing an old thermostat.

- Compatible with 24–230V on/off appliances such as gas boilers and zone valves (T4M is for OpenTherm boilers only)
- Ideal for controlling combi boilers with two-wire, volt-free connections
- Suitable for use as a room temperature thermostat for S&Y Plan systems or for additional zones in an S Plan Plus system
- Universal wall plate, with easy wire path to connections and a clip-on cover to the fixed wall plate, simplifies installation and improves cost-efficiency
- After fitting, T4 Series thermostats are ready to use, requiring minimal effort to explain the functions to the customer
